

The University of Applied Forest Sciences Rottenburg participates in the digital IUFRO World Day.

The banner features the IUFRO logo (International Union of Forest Research Organizations) on the left, the text 'IUFRO WORLD DAY' in large bold letters in the center, and '28-29 September 2021' below it. On the right, there is a logo for the 'Federal Ministry Republic of Austria Agriculture, Regions and Tourism'. The main text on the banner reads: 'Tuesday, 28 September | 08:45 - 09:45 am UTC', 'Excellence in research and teaching along the forest value chain - a contribution to overcoming global challenges', 'University of Applied Forest Sciences Rottenburg', and 'This session introduces examples and results of recent research on forests, forest services and forest products.' At the bottom, it says 'Rottenburg, Germany → FIND US ON THE WORLD DAY MAP!' with a location pin icon. The background of the banner shows an open book with a blurred forest scene in the background.

On September 28 and 29, 2021, the IUFRO World Day - a global digital event on forest science topics - will take place. The University of Applied Forest Sciences Rottenburg (HFR) will also participate in this event.

IUFRO - the International Union of Forest Research Organizations - is a worldwide network for scientific cooperation in the field of forests. Its members are organizations that deal with forest ecosystems and their services, forest products of all kinds and their use, and the people living in and with the forest. Through its work, IUFRO makes an important contribution to achieving the United Nations Sustainable Development Goals.

At the first-ever virtual IUFRO World Day on September 28-29, 2021, numerous IUFRO member organizations and working groups will present their projects and network. Participants will gain insights into the current state of research on forests and their ecological, social and economic importance.

On Tuesday September 28, 2021 at 10:45 - 11:45 CEST (08:45 - 09:45 UTC), Rottenburg University of Applied Forest Sciences will present its teaching and research activities. In a short presentation at 10:45, current projects e.g. in forest ecosystem research, the innovative use of wood and from forest policy will be presented. At 11:00 a.m. an online forum will follow, in which lecturers and students of the HFR will respond to questions and discussion contributions of the participants.

The event is open to the public. Attendance is free. Registration is required on the IUFRO website <https://www.iufroworldday.org>. The overall program of the IUFRO World Day is also presented on this page.

We cordially invite all those interested in forests to participate in the IUFRO World Day.

IUFRO, founded in 1892, is a global, non-profit scientific and non-governmental organization headquartered in Vienna. With about 600 member organizations in more than 120 countries, IUFRO connects over 15,000 researchers worldwide. An average of 70 IUFRO conferences are held each year, and every 4 to 5 years IUFRO hosts the World Forestry Congress.

IUFRO World Day

Digital Forest Science Forum

Members of the global IUFRO network will show and share forest-related research work, projects, news and more!
