

*Prof. Dr. Bastian Kaiser* is professor of applied economics and has worked as a project manager and consultant in several Latin American countries. Since 2001 he is the rector of the University of Applied Forest Sciences Rottenburg, Germany. He is engaged in transforming the University of Forestry into a comprehensive programme with a broad range of professional opportunities, including bio-energy and material uses of forest biomass as well as multifunctional forest management.

From 2013 to 2021 he was President of the Rectors' Conference of the Universities of Applied Sciences in Baden-Württemberg State in Germany, representing 24 universities, more than 3.000 professors and about 110.000 students in aspects of higher education policy and fiscal affairs. Since 2007 (and still) he has been a member of the board of directors of the Rectors' Conference.
